Drugstores sell some medicine that can help, too. You can ask the people who work at the store which is the best medicine for you. When you use the medicine, you must read the labels very carefully so you can know how much to take.

One more important thing to do when you have a cold is to rest a lot. You should go to bed and let your body take care of itself. If you try to work or move too much, it will take longer for you to feel better.
